## **OSHKOSH SPECIALTY VEHICLES BUILDS MOBILE BONE DENSITOMETRY VEHICLE FOR GUNDERSEN LUTHERAN**

*Vehicle offers safe and quick bone density tests for at-risk populations.*

**Calumet City, IL. (July 24, 2009)** -- Oshkosh Specialty Vehicles (OSV), an Oshkosh Corporation (NYSE:OSK) company, has delivered a mobile bone densitometry vehicle to Gundersen Lutheran Health System, headquartered in La Crosse, Wis. The vehicle enables Gundersen Lutheran to provide bone mineral density (BMD) tests to patients in the tri-state region of Wisconsin, Minnesota and Iowa.

The 33-foot examination vehicle regularly travels to 18 sites across Gundersen Lutheran's service area, and is operated by radiologic technologists who are specially trained in bone density imaging.

"Reaching out to at-risk populations is a key advantage of mobile medical diagnostic vehicles like this bone densitometry vehicle," said Tony Ellis, Oshkosh Specialty Vehicles vice president and general manager. "The vehicles that OSV manufactures allows health care providers to take exam vehicles to conveniently-located sites, where care providers are better able to diagnose and treat patients more effectively."

"These tests are a very important diagnostic tool for the early detection of osteoporosis, and the vehicle is on the road five days a week," said Sue Einerwold, Gundersen Lutheran manager, diagnostic imaging. "Osteoporosis can be prevented or reversed if low bone mass is detected early, that's why this mobile vehicle is a vitally important part of our mission to provide critical healthcare services to those in need."

An estimated 44 million Americans are affected by osteoporosis, resulting in over 1 million fractures per year. Osteoporosis can be prevented or reversed if low bone mass is detected early. The BMD test is safe, quick, easy to administer. The OSV mobile bone densitometry vehicle allows patients to save time and fuel otherwise required to travel to the main campus in La Crosse.

### **Forward-looking Statements**

This press release contains statements that the Company believes to be “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including without limitation, statements regarding the Company's future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this press release, words such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “should,” “project” or “plan” or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company's control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the consequences of financial leverage associated with the JLG acquisition, including the level of the Company's borrowing costs, the increased interest rates the Company would face if it experienced a deterioration or downgrade in credit agency ratings and the Company's ability to maintain compliance with its financial covenants under its credit agreement; the cyclical nature of the Company's access equipment, commercial and fire & emergency markets, especially during a global recession and credit crisis; the duration of the global recession and its adverse impact on the Company's share price, which could lead to additional impairment charges related to many of the Company's intangible assets; the expected level and timing of U.S. Department of Defense procurement of products and services and funding thereof; risks related to reductions in government expenditures and the uncertainty of government contracts; the potential for commodity costs to rise sharply in a future

economic recovery; risks associated with international operations and sales, including foreign currency fluctuations; risks related to the collectability of receivables during a recession, particularly for those businesses with exposure to construction markets; and the potential for increased costs relating to compliance with changes in laws and regulations. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission.
